SUMMARY

Senior Python Developer with 7+ years of backend experience, currently at EPAM Systems building Python and TypeScript services for healthcare platforms with REST and GraphQL APIs on AWS. Previously spent over three years on the CTRL Wallet (XDEFI) multichain wallet, designing microservices, blockchain indexers, and Web3 infrastructure, with earlier work in fintech, NFT marketplaces, and e-commerce.

Works AI-native: ships through spec-driven workflows with Claude Code and other coding agents, writes custom agent skills and rules, and integrates MCP, RAG, and agentic pipelines. Hands-on with AWS and Azure, Docker, Kubernetes, CI/CD, and a self-hosted home lab, and builds native desktop and WebAssembly apps in Rust.

EXPERIENCE

Senior Python Developer — EPAM Systems

Apr 2026 – Present · Remote

Building scalable Python backend services in the healthcare domain with an AI-native development workflow, using LLM-powered agents and tooling across design, coding, testing, and review.

- Design and develop backend services with REST and GraphQL APIs in Python (FastAPI) and TypeScript for healthcare platforms, with a focus on reliability, performance, and maintainability.
- Build and operate cloud-native services on AWS (Lambda, ECS, S3, RDS, SQS/SNS, API Gateway), with infrastructure and deployments automated through CI/CD.
- Drive an AI-native engineering workflow: use AI coding agents (Claude Code, Copilot) for spec-driven development, code generation, refactoring, test authoring, and code review.
- Author custom agent skills, prompts, and MCP tooling that encode team conventions and domain knowledge, making AI agents productive and consistent across the codebase.
- Integrate LLM capabilities into products — retrieval-augmented generation (RAG), structured extraction, and agent/tool-calling pipelines over clinical and operational data.

Tech: Python, TypeScript, FastAPI, Pydantic, SQLAlchemy, Celery, GraphQL, LLM APIs (Claude, OpenAI), RAG, AI Agents, Custom Agent Skills, MCP, Claude Code, AWS (Lambda, ECS, S3, RDS, SQS, API Gateway), PostgreSQL, Redis

Senior Backend | Blockchain Developer — Devico

Dec 2022 – Mar 2026 · EU / Remote

Senior engineer on the CTRL Wallet (formerly XDEFI) multichain wallet, designing and scaling distributed microservices and Web3 infrastructure across cross-functional teams.

- Designed, built, and delivered high-performance microservices using REST, GraphQL, and gRPC.
- Led development of a high-throughput blockchain indexer and core Web3 infrastructure components.
- Architected modular, testable codebases and resolved large-scale technical bottlenecks to improve system robustness.
- Optimized CI/CD pipelines with GitHub Actions, significantly speeding up deployments.
- Ran scalable backend infrastructure with Docker, NATS, PostgreSQL, and Redis on AWS.

Tech: Python, TypeScript, Go, FastAPI, Flask, Strawberry GraphQL, NestJS, ExpressJs, Strapi, gRPC, Celery, BullMq, SQLAlchemy, TypeORM, PostgreSQL, Redis

Python Developer (part-time) — S-Pro

Apr 2022 – Dec 2022 · Remote

- Developed backend APIs with Django and Django REST Framework.
- Built EVM blockchain integrations and on-chain data processing.

Tech: Python, Django, Django REST Framework, PostgreSQL, Web3 (EVM), Docker, GitLab CI/CD

Python / Django Developer — Zestbloom Inc.

Jun 2021 – Mar 2022 · New York, NY

- Designed and implemented RESTful APIs with Django REST Framework to support an NFT Marketplace on the Algorand blockchain.
- Implemented JWT-based authentication using Django Simple JWT with custom enhancements to improve API security.

Tech: Python, Django, Django REST Framework, Django Channels, JWT, Django Simple JWT, Celery, Algorand Blockchain, Linux (Arch, Debian), Docker, Docker Compose, Kubernetes (basic)

SQA Python Engineer — Instigate Mobile CJSC

Sep 2019 – May 2021 · Remote

- Developed an automation framework for testing REST and GraphQL APIs.
- Integrated TestRail, Allure, and Google Sheets as third-party services to generate comprehensive reports on test case run results.

Tech: Python, Java, Object-Oriented Programming (OOP), Multiprocessing, PyTest, REST APIs, GraphQL, Linux, Git, Postman, Jira, TestRail, Allure, Google Sheets API

Software Developer — Independent

Feb 2017 – Apr 2019 · Remote

- Collaborated with clients to understand project requirements, goals, and deliverables.
- Developed custom software solutions tailored to meet the specific needs and objectives of each client.

Tech: PHP, JavaScript, HTML, CSS, Wordpress, ModX, JQuery, Bootstrap, MySQL

SELECTED PROJECTS

5D Painting p5d.notallow.cc — Rust desktop and WebAssembly studio that turns photos into diamond-painting and cross-stitch patterns: thread-catalog color matching (CIEDE2000, dithering), PDF/SVG/Excel/OXS export, and an axum/Postgres account API.

Resources for Mac resources.vachagan.dev — Native macOS system monitor in Rust/egui with an interactive app/process overview, per-resource pages, a menu bar extra, and Homebrew distribution.

FastQL github.com/MyGenX/FastQL — Open-source, code-first Python GraphQL framework with its own execution engine, DI, subscriptions, Federation v2, and FastAPI/Django/Flask integrations.

TypeWall github.com/MyGenX/TypeWall — Strict, schema-first runtime validation library for Python with structured errors and JSON Schema/OpenAPI output.

SpecStat specstat.vachagan.dev — Serverless OpenSpec UI that turns specs into Kanban boards and dependency graphs, with GitHub Actions as the only backend.

Vogi chat.vachagan.dev — Realtime chat and calling platform with WebRTC calls, presence, and media messaging on FastAPI, Socket.IO, and Redis; Rust microservices backend in progress.

Cloud Integration (Azure) — Cloud DevOps for a Dutch ICT provider (11/2024 – 05/2025): Azure, Terraform, Kubernetes, CI/CD, and Prometheus/Grafana monitoring for new cloud products.

Self-Hosted Home Lab — Docker-based home server with CI/CD auto-deploys, WireGuard VPN, Cloudflare-fronted reverse proxy, private DNS, and OpenTelemetry/Jaeger observability.

SKILLS

Languages	Python, TypeScript, Go, Rust
Backend & APIs	FastAPI, Pydantic, Flask, Django, Django REST Framework, GraphQL, Strawberry GraphQL, NestJS, Express.js, gRPC
Data & Storage	PostgreSQL, Redis, NoSQL, Firebase
Infra & DevOps	Docker, Docker Compose, Kubernetes, AWS, Azure, Terraform, CI/CD, GitHub Actions, Linux
Messaging & Observability	NATS, OpenTelemetry, Jaeger, Prometheus, Grafana
Testing & Tooling	Unit Testing, Git, Jira, Confluence
Blockchain	Blockchain, Web3, Bitcoin, Algorand, Solana, EVM
Architecture	Microservices, Distributed Systems, Software Architecture, API Development
Desktop & WebAssembly	Rust, egui, WebAssembly
AI / LLM Engineering	AI-Native Development, AI Spec-Driven Development, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), AI Agent Development, Custom Agent Skills, LangChain, LangGraph, Claude Code, OpenAI Codex, LLM (Large Language Models)

EDUCATION

Bachelor's Degree, Informatics and Applied Mathematics — Sep 2013 – Jun 2017
National Polytechnic University of Armenia

LANGUAGES

English: Upper-Intermediate · Armenian: Native

CERTIFICATIONS & COURSES

- Cybersecurity Essentials — Cisco Networking Academy
- Cybersecurity Introduction — Cisco Networking Academy
- AI Fluency: Framework & Foundations — Anthropic · Apr 2026
- Claude 101 — Anthropic · May 2026
- Claude Code 101 — Anthropic · May 2026
- Introduction to Model Context Protocol — Anthropic · May 2026
- Building with the Claude API — Anthropic · Jun 2026
